← 1/2 Set Yakima front rack sold separately

New Adjustable Uprights w/ Style #1 and Style #2

Oak Orchard's Pick up Truck "Rear Racks" can carry two canoes side by side, 3 Kayaks flat (right side up) or 5 Kayaks on their side. Won't Shake and Sway like flimsy aluminum snap together in the box styles. We recommend a half set of a Yakima rack over your cab. (Sold Separately) This will make for an easy on/off, secure and rigid carry system. We can fit any car or truck with or without gutters. Below, a Sierra with rigid tonneau cover. Uprights can be removed. Approx 3" of plate will be seen. Kayaks below are in Gull Wing Saddles.

Front rack locks \$39/pr., 9' Locking Cable \$59.00

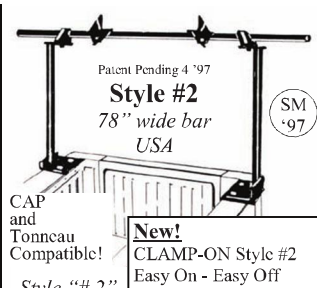

Above left: Front mounted Style #3 with 5th wheel trailer.

Lucas and brother Logan showing us how easy car topping can be.

## THREE STYLES! ONE IS RIGHT FOR YOUR TRUCK!

Style #1 uprights are adjustable in height for mid-size or full size trucks with an open box

Style "#2" uprights are adjustable in height for both compact sized & full sized trucks fitted with caps or tonneau covers!

Tonneau Cover and Cap Compatible! Choose Bolt on or Removable Clamp on style.

Tail Light Assembly Removed shows the collapsed nutserts

NEW!

Adj. up-rights for height

Shown: Installed Nutserts

Above: Style #1 rear rack and a half set of Yakima "Q" tower front.

All new full size and mid sized trucks will require the deluxe Nutsert system. This includes four Nutserts, four washers, four mounting bolts. You will need one 1/2" wrench or ratchet, one electric drill, drill bits - 1/4" & 1/2". End result is two small threaded holes on each side to mount the uprights. Easy on-off!

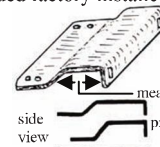

NOTE: Trucks with bed liners, it will be necessary to drill your 1/2" hole thru both the liner and truck sidewall at the same time. Nutserts install into the cavity behind your tail lights.

**Style #2.** The "UNIVERSAL" RACK fits most flat top side rails of the truck box. A 5" x 10" plate will mount to the top rail. (Please, measure this width.) To this, the uprights will bolt. Uprights can be quickly removed, leaving only the plate on the side rails.

**Basic Bolt On:** Incl. mounting hardware, 2 base plates, 2 uprights, 2 aluminum crossbar connectors with set screws, wrench, 78" round Yakima cross bar.

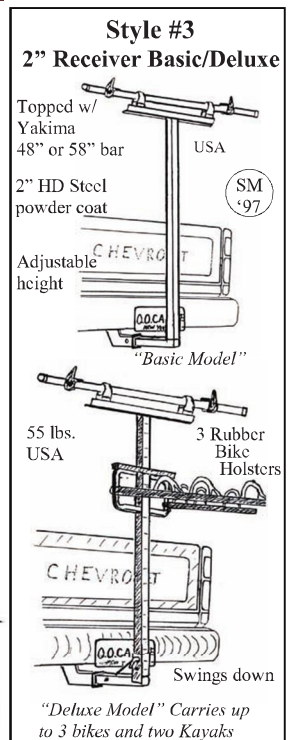

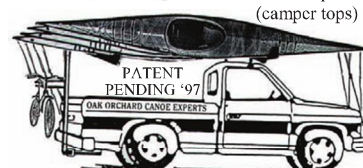

**Clamp On:** Four ViseGrip looking devices will clamp the plate to the under rail (instead of a nut and bolt).

**Special Tacoma Plate:** mounts into 3 sided factory installed tracks.

We have 9 preformed styles to fit under all tonneaus!

Flat Plate \$299 up (camper tops)

"Deluxe Model" Carries up to 3 bikes and two Kayaks
